NSW IS AT A CROSSROADS.

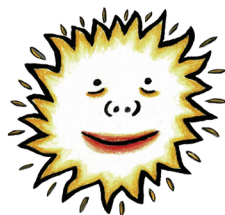

**One path leads to clean air,
clean water and clean energy.
The other leads us deeper into
the damage of coal and gas mining.**

Throughout history, there are rare moments that build people power and shift the course of our collective futures. Saturday, March 24 - one year before the next NSW election - will be one of these moments.

We need you, your family, your friends and your neighbours to rally for our future. Let's put our politicians on notice and demand urgent action to protect land and water, communities and cultural heritage.

**We can't wait another year for action.
March 24, 12 Noon at NSW Parliament
it's #Time2Choose.**
