

hot water free from the sun
Solahart Northern Beaches

Hot Water Free From The Sun, Naturally

Come and find out more ...

Saturday 30th May in Elvina Bay from 11 – 11.45am

How

Solahart Hot Water System's slim solar panels on your roof will do it. As the water circulates through them, the sun heats it naturally so you get hot water heated free from the sun. On tap. Everyday.

Solahart hot water heaters save on energy and that helps save our environment. It saves on water heating costs when electricity prices are set to rise. With a Solahart hot water system you get it all. It's free and natural! When you install a Solahart water heater you can be sure you are making the right choice.

Facts To Consider

- By using the sun's free energy you can reduce your hot water energy consumption by up to 90%*
- An average home can expect to save around \$375** off it's energy bills year after year
- A family of four with a Solahart water heater can save up to 3.5 tonnes of greenhouse gas emissions (equivalent to taking a small car off the road) compared to a conventional electric water heater

The Benefits

- Electric water heating is the single biggest contributor to household greenhouse gas emissions so by using a Solahart we are helping our environment
- Installing a solar can often be less than the cost of replacing an electric hot water system
- Solahart is Australian manufactured
- Solahart hot water systems are so good for the environment that big *Government rebates* are available to help you make the switch

We are visiting with Tanya Mottl at the open home at 15 Warringulla Avenue on Saturday 30th May from 11-11.45am so if you have any questions, come and ask us!

There has never been a better time to go solar. We at Solahart Northern Beaches would be more than happy to advise you on which of the Solahart water heaters is best for your needs. We can show you just how much you can save and how inexpensive a Solahart can be.
