

You're invited

Scotland Island energy reliability project community information sessions

Work has been approved to start, and we are finalising details prior to starting construction in August.

When

Session 1

Thursday 25 July 2019 – 5:30-7:30pm

Session 2

Saturday 27 July 2019 – 10:00am-12:00pm

Where

The Waterfront Café
1860 Pittwater Road
CHURCH POINT NSW 2105

Update on the project

Come along to a community information session to find out more about the project. There is no formal presentation. Drop in and have a chat with the Project Team.

Work dates

Work is planned to start in early August and expected to take between four and five months to complete.

Church Point car park

The construction site will occupy a section of the car park. We have been working with our contractor to keep the area to a minimum however, approximately 15 per cent of spaces will be affected. Alternate parking and transport options are being confirmed.

Submarine cable from Church Point Car Park to Richard Road, Scotland Island.

Richard Road

A section of the road, above Carols Wharf, will be closed to vehicles for the duration of the work.

Keeping you informed

We understand reaching offshore residents can be difficult. To receive project newsletters and updates by email, send your details including name, address and email to majorprojects@ausgrid.com.au

Next steps

We will share more details through a project newsletter in the coming weeks.
