West Pittwater Energy Reliability Project Construction work in Lovett Bay

As you are aware, Ausgrid is planning to improve the reliability of the local power supply to West Pittwater (McCarrs Creek, Elvina Bay, Lovett Bay and Morning Bay), following extended power outages to the area in previous years.

Ultegra (with specialist contractors) is doing this work on behalf of Ausgrid. The work involves drilling two boreholes, one from Lovett Bay and one from Catherine Park into Pittwater, installing a High Density Polyethylene (HDPE) pipe inside these boreholes, and then pulling a cable through the boreholes and between Lovett Bay and Catherine Park.

Work in Lovett Bay

The work in Lovett Bay involves using a directional drilling machine to bore a hole in rock, approximately 250 metres long, from Bona Crescent into Pittwater. Please see map overleaf for location of work.

The project team are expected to start setting up the site compound and preparing the area for the drilling rig from **Friday 1 October 2021**. Please note that no construction works are proposed over the long weekend.

The drilling rig and associated equipment are expected to be delivered to site by barge from **Friday 8 October 2021**. During this work, you may notice more boats and workers in the area.

The project team will then set up the drilling rig within our compound and additional noise reduction blankets will be installed around the rig and on the compound fencing.

The drilling is then expected to start from **Monday 11 October 2021**. We still expect to complete the drilling in late October 2021, weather and ground conditions permitting. We will notify you if this program changes.

Work hours

With statewide changes to construction working hours due to Covid-19, we are proposing to extend our usual working hours on site.

We are proposing to work:

- **Monday to Friday 6am to 6.30pm – with drilling work between 7am and 6pm**
- **Saturday 7.30am to 5.30pm – with drilling work between 8am and 5pm**
- **Sunday 7.30am to 5.30pm - with drilling work between 8am and 5pm**

Please note: outside the abovementioned drilling hours, you will notice the project team on site, preparing for the work and carrying out maintenance work on the equipment. These extended hours will allow us to complete the drilling works in a timely fashion. We will continue to monitor noise levels and will shorten drilling hours, if required or if the statewide changes to construction working hours change.

What to expect during our work

Work will be noisy at times, and there will be an increase in vehicle movements. We will minimise the impacts to you by:

- installing noise blankets around excavations and noise generating equipment

- directing lighting away from residential properties, and
- carrying out regular inspections to ensure minimal impact to surrounding residents.

We apologise for any inconvenience that this work may cause.

Access on Bona Crescent

Pedestrian access on Bona Crescent will be maintained throughout the work.

Access for emergency vehicles through Bona Crescent will be available at all times.

Keeping you informed

Ausgrid will issue email notification updates detailing work locations and dates. Residents can register for these updates to be emailed to them at majorprojects@ausgrid.com.au.

For enquiries related to construction, please contact Ultegra on 0409 736 064 or at enquiries@ultegra.com.au.

For information related to the project visit our website at www.ausgrid.com.au/West-Pittwater-reliability-project. Alternatively, you can contact Ausgrid on 1800 604 765 or majorprojects@ausgrid.com.au.

We apologise for any inconvenience this work may cause you and thank you for your continued patience.

Yours sincerely,

Matt Irla - Project Development Manager
