

Waste Management Sub-committee report AGM 2015

Key issues raised from community with the sub-committee & discussed with PWC were:

1- *That the skips at Bell & other wharves are overflowing regularly - SIRA raised this with PWC and*

Response- PWC has installed organized for the contractor URM to install additional skips. Will be monitored.

2- *The lids on the skips were to be locked with 400l bin size smaller lids- however they are not locked and the holes are too small*

Response- PWC will discuss with URM

3- *Chipper and/or extra green waste to deal with all the post-storm additional vegetation*

Response- Additional cleanup was organized (Note- insufficient notice was provided for residents- PWC said would consider additional cleanup

4- *Cleanup on the top of the island and green pickup both missed due to the road closure*

Response- Cleanup was delayed until the road repaired and additional green waste pickup.

5- *Skips are continually filled with inappropriate materials.*

Response- PWC committed to additional signage and monitoring by wharf ranger.
