

## Community Hall Subcommittee

Adrian Matthews, Graeme Crayford, Cass Gye

- 1. Increase in Hall Expenses:** It is noted that there have been significant increases in electricity and cleaning costs. It was discussed that this was due to the new hot water boiler installed in the Kitchen and perhaps the air-conditioning system.  
**Hot water boiler has been turned to standby.** Install a push button timer for air-conditioning suggested.
- 2. Hall Painting:** Pat Rudgeley has emailed regarding painting inside and outside the Hall as routine maintenance. It was thought that painting outside the Hall presented no problems, however, the inside was more of an issue. The recommendation was to discuss painting the ceiling and perhaps both end walls to lighten up the space and to cover up the circle left on the wall next to the round window by the tapestry, but retain the remainder. The toilet area is badly in need of painting/refurbishment. I have emailed Pat, still waiting on reply.
- 3. Other Items:** Previous upgrades to the Hall as discussed with Council included:
  - Replacing spherical light with low voltage downlights
  - Covering the balcony per schematic provided (see attachment)
  - Closing in Players' storage space underneath Hall, possibly with roller door**Action: Adrian to include this request in email to Pat Rudgeley**
- 4. Tables and Chairs:** It was noted that the tables are looking a bit tired and it was agreed to request Council to provide 10 new tables as well as 40 stackable chairs.  
**Action: Adrian to include this request in email to Pat Rudgeley**
- 5. Wall Hanging:** The wall hanging has been badly damaged since being placed on the lengthways wall. **Action: Adrian to revisit the possibility of a perspex or safety glass cover for tapestry; Cass to enquire repair work from original artists**
- 6. Cleaning Schedule:** Cath feels reducing hours is possible. Schedule to be confirmed.
- 7. Cafe:** It was decided to recommend to SIRAC that an EOI to run a Cafe in the Hall be revisited. **Action: Adrian to source previous EOI in PON**
