

## Waste Management Sub-committee report April 2015

### April Report:

Nothing of major significance to report since last meeting, updates from council on waste management issues are:

- *Skips on wharves-*
  - New lids for the skips with smaller holes to limit putting large items are being sourced by URM and will be installed in June.
  - In response to community complaints about illegal dumping on wharves there will be new signage installed
  
- *Collection of recycling from individual jetties- some waterfront residents where road access is a problem have complained that under the new contract recycling is no longer collected from jetty- only from road. To be discussed at next Sub-committee.*
  
- *Proposed changes to the green and general waste removal-* PWC still looking at potential changes to frequency and mode of green waste collection.

### Discussion Items for SIRAC:

*None*

### Decision items for SIRAC:

*None*
